

Big City Builders

3+

Big City Builders is a puzzle-and-play construction game for preschoolers. Your child will have fun building roads and delivering materials, and they'll be learning along the way!

- fine motor skills • color matching • following directions
- taking turns • decision making

Includes:

- 1 Color Die
- 2 Truck Movers
- 6 Straight Road Puzzle Pieces
- 12 Curved Road Puzzle Pieces
- 3 Crossroads Puzzle Pieces
- 3 Roundabout Puzzle Pieces
- 6 Construction Sites
- 12 Material Tiles

Get to Know the Game!

First, carefully remove the pieces from their punchboard frames from back to front and discard any plastic bags and punchboard frames.

Before you play, get familiar with the pieces. Put the roads and construction sites together, drive around, and load and unload materials. What are the materials and where do they go? Talk about what the builders are doing at each site. All road sections and construction sites can be rotated and used in different ways.

Instructions

For Younger Children

Object

In this game, both players work together to get the mixed-up materials to the right construction sites.

Set Up

- Spread the construction sites out in the play area. Work together to connect the sites with road pieces however you'd like.
- Beside the construction sites, stack two material tiles face up that **do not** belong to that site. (The correct material for each site is shown on the bottom left of the site.)
- Put the die aside for now. You will use it in the game for Older Children.

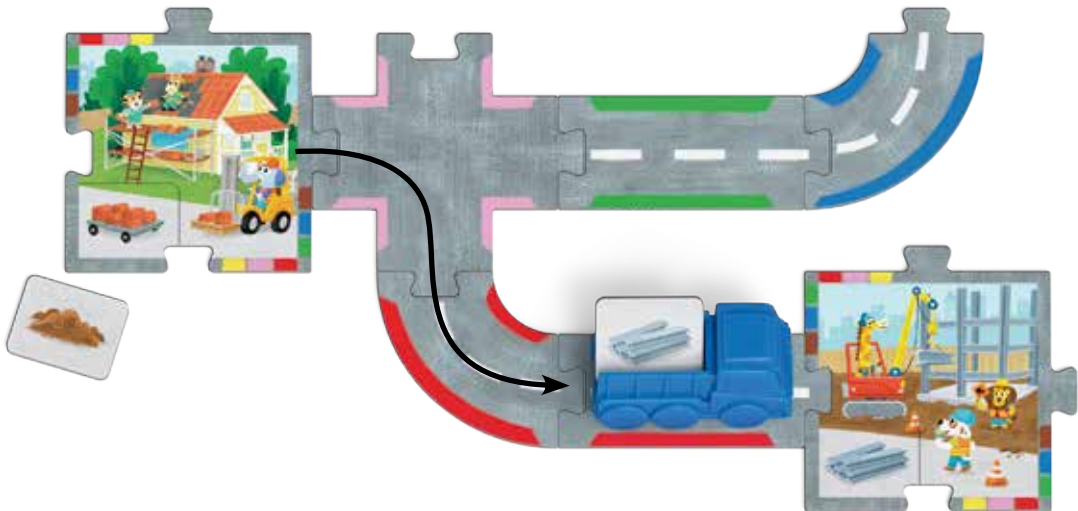

- Each player chooses a truck and puts it on any construction site.

How to Play

On your turn, load the top material tile from the construction site you're at into your truck. Drive your truck along the roads to deliver the material to the right construction site. Now it's the next player's turn.

Winning

Everyone wins when all of the materials are at the right construction sites.

For Older Children

Object

Collect the most stars by delivering material tiles to the right construction sites.

Set Up

- Spread the construction sites out in the play area. Work together to connect the sites with road pieces however you'd like.

- Beside each construction site, place two material tiles face up that **do not** belong to that site. (The correct material for each site is shown on the bottom left of the site.)

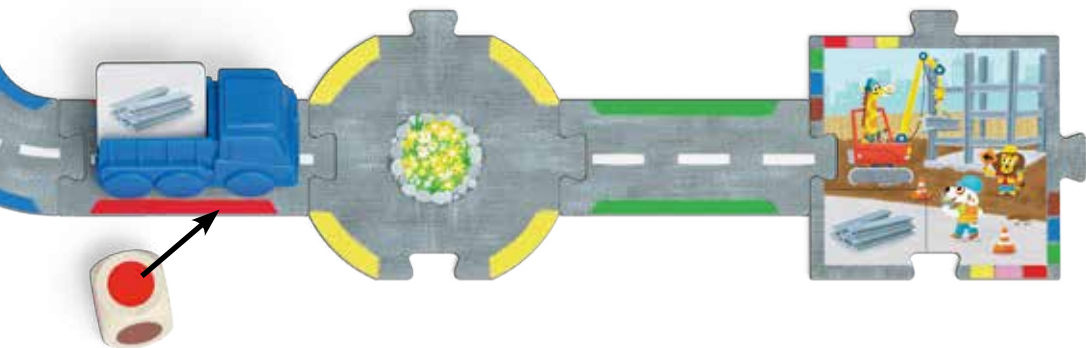

- Put the die where everyone can reach it. The color die determines how far the trucks can move.

- Each player chooses a truck and puts it on any construction site.

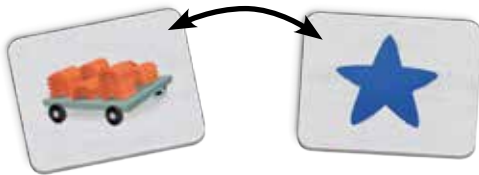

How to Play

The first player loads the top material tile at the site they're at and rolls the die. Which color did it land on? You can drive as far as that color toward the construction site you need to go to.

Note that construction sites show all colors. If there is no road with the color you rolled between the truck and the construction site, go directly to the site.

If you arrive at the correct construction site and deliver the material, collect the material tile and put it in front of your star-side-up.

Now it's the next player's turn.

Note: If there are no tiles left on a site, you'll have to roll the die again on your next turn and drive to another site to load materials.

Winning

When all the tiles are gone from the sites, the player who has the most stars wins!

Solo Play

Your child can play on their own, building roads and loading and delivering materials! They can add other toys to build scenes and cities.

About Ravensburger

Founded in 1883, Ravensburger is a leading producer of puzzles and award-winning board games, as well as engaging art and science kits.

As a family-owned business, Ravensburger has built a reputation as a trusted brand for parents and children alike.

Ravensburger's toys, games, and puzzles encourage discovery of what really matters through play.
